## EDUCATION

---

### Aptech Computer Education

Oyo, Ibadan

Certificate of Proficiency in Information System Management

July 2025

Diploma in Software Management

Advanced Diploma in Software Engineering

Major: Software Engineering, Software Project Management

## PROFESSIONAL EXPERIENCE

---

### Freelancer

Remote | April. 2021 - Present

- Developed, deployed, and maintained custom web and mobile applications for over 20 clients across industries including e-commerce, healthcare, education, and fintech.
- Built responsive front-end interfaces using React, Vue.js, and Tailwind CSS, and implemented scalable back-end systems with Node.js, Django, and Firebase.
- Designed and optimized relational and NoSQL databases (e.g., PostgreSQL, MongoDB) to support complex business logic and ensure performance under load.
- Consulted clients on product strategy, UX design, technical feasibility, and best practices, often acting as both developer and tech lead.
- Maintained 100% client satisfaction rate, with many repeat clients and long-term engagements.

### BeeSeek - Service Marketplace Platform

System Architecture, Frontend & Platform Management [beeseek.site](https://beeseek.site)

Node.js, Next.js, React, Tailwind CSS, postgresSQL

July 2025 – Present | [beeseek.site](https://beeseek.site)

- Architected and delivered the core platform for BeeSeek, a service marketplace connecting verified professionals with clients and enabling structured, transparent work engagements across multiple categories including home repairs, cleaning, technical services, personal care, and events.
- Built a modular, high-performance React/Next.js frontend, implementing reusable components and responsive layouts that support clear job listings, client booking flows, and professional profiles, improving user clarity and onboarding efficiency.
- Designed and implemented scalable backend architecture and database models, mapping clients, verified service providers, job categories, work orders, protected payment flows, and payout histories to ensure data consistency, integrity, and future extensibility.
- Defined and executed a strategic four-stage product roadmap, (frontend foundation, backend APIs, real-time communication, deployment) with business objectives and early access rollout goals.

- Led user testing and iterative UX improvements, reducing onboarding confusion and improving usability based on early user feedback to create a smoother experience for both clients and professionals.

## LEADERSHIP AND PROFESSIONAL DEVELOPMENT

---

### Aptech Techwiz Inter-Center Competition Participant

Oyo, Ibadan | Oct. 2024

- Spearheaded a team which Ranked **Top 0.25%** Finalist in a Competitive field of **4000+** participants in the Inter-Centre annual Techwiz competition demonstrating exceptional problem solving and team-collaboration.
- Participated in global knowledge-sharing and ideation with experienced tech leaders due to the placement.
- Engaged in cross-cultural exchange with veteran professionals from diverse international backgrounds; contributing to concept development and innovation.

### Tech Expo 2025 – Attendee

Ibadan, Oyo State | 2025

- Attended Tech Expo 2025, engaging with emerging technologies, startups, and industry innovations across software engineering, product design, and digital transformation.
- Participated in technical sessions, product showcases, and networking activities with industry professionals, founders, and tech enthusiasts.
- Gained exposure to real-world applications of modern technologies and trends shaping the African and global tech ecosystem.

### Google Developer Group (GDG) DevFest Ibadan 2025 – Attendee

Ibadan, Oyo State | 2025

- Participated in Google DevFest Ibadan 2025, a flagship developer conference focused on Google technologies and modern software development practices.
- Attended sessions on web development, cloud computing, mobile development, AI, and developer best practices led by experienced engineers and community experts.
- Networked with developers, designers, and tech leaders within the GDG community, fostering professional growth and collaboration opportunities.

## AFFILIATION AND SKILLS

---

**Programming Languages:** Python, Java, Spring, Javascript, HTML, CSS, C#, SQL, Bootstrap, Tailwind, Dart, Typescript.

**Frameworks & Tools:** Angular, React.js, Next.js, Node.js, Django, ASP.NET Core, Flutter.

**Cloud Platforms & Tools:** Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP), Firebase, Netlify, Vercel.

**Databases:** MySQL, SQLite, Firestore, PostgreSQL.

**Languages:** Yoruba (Native), English (Proficient).

## PROJECTS

---

**Currensee** | Agile Methods, Flutter, Firebase, Dart, RestAPI.

*Feb. 2024 - March 2024*

- Developed a cross-platform mobile app enabling real-time currency conversion between **150+** currencies with up-to-date exchange rates.
- Optimized UX with intuitive search, Conversion history, and a trained AI for faster feedback and a smooth overall User experience.
- Led back-end in organizing user data with Google Firebase ensuring responsiveness for storing and directing user customized notifications on selected currencies.

**E-Lib** | Typescript, Next.js, TailwindCSS, PostgreSQL/SQLite, Django Rest Framework.

*April 2025 - June 2025*

- Developed a digital solution designed to automate and optimize the functionality of a traditional library. It enables library staff, registered users, and guests to interact with a modern, easy-to-use web platform for managing book inventories, issuing and returning materials, reading e-Books, watching video tutorials, and generating usage reports.
- Automates all library functions (book registration, borrowing, returning) and enables both physical and digital media access (books + videos).
- ✦ Supports real-time analytics, user authentication, and data security and empowers users to browse, read, and interact with content from anywhere.

Independently developed the complete full-stack solution, leveraging weeks of intensive research and progressive learning from diverse technical resources, documentation, and best practices.

Demonstrated end-to-end ownership of the project life-cycle, from database design and back-end API development to front-end integration and deployment.
